

HARSH KUMAR RAJBHAR

+91-8866128435 ◇ Ahmedabad, Gujarat

hkrajbhar2002@gmail.com ◇ [linkedin.com](https://www.linkedin.com) ◇ github.com

Professional Summary [\[PORTFOLIO LINK\]](#)

- Expertise in creating responsive and user-friendly interfaces with a focus on scalability and maintainability.
- Over 3 years of experience developing dynamic, high-performance web applications using Angular and modern front-end technologies.
- Skilled in leading product analysis, troubleshooting complex issues, and collaborating across cross-functional teams to deliver quality solutions.
- JIRA Experience: Hands-on experience with JIRA for defect tracking, requirement management and reporting.
- Collaboration: Actively participated in discussions with onshore team members regarding tasks, requirements, issue resolution, and daily updates.

SKILLS

Frameworks & Libraries: Angular, Tailwind CSS, Ionic Framework, Prime Ng, Kendo (Telerik) UI, Angular Material

Languages : JavaScript , TypeScript, HTML5, CSS3, Responsive Design

Tools & Technologies: Git, RESTful APIs, Postman

Performance Optimization : Debugging, code refactoring

Soft Skills : Cross-functional collaboration, tech support, Leadership, Teamwork

EXPERIENCE

Angular Developer

Everest Instruments Pvt. Ltd. at Ahmedabad, Gujarat

Oct 2023 - Present

- Developed and maintained high-performance e-commerce web applications using Angular, ASP.NET, and MS SQL Server, focusing on delivering seamless user experiences and optimizing online transaction and order management systems.
- Designed and implemented interactive and scalable Angular applications, delivering high-quality user experiences for web-based solutions.
- Optimized application performance by conducting complex product analysis and implementing performance-enhancing strategies, including lazy loading and tree-shaking.
- Developed and maintained reusable UI components using Angular and TypeScript, improving project efficiency by reducing development time.
- Collaborated with product, design, and QA teams to align technical implementations with business goals and ensure timely delivery of features. [\[Link\]](#)

Frontend Developer

Booz Mobility at Ahmedabad, Gujarat

Aug 2022 - Sep 2023

- **Hybrid App Development:** Built feature-rich, cross-platform mobile applications using Angular, Ionic Framework, and Capacitor, ensuring compatibility with iOS and Android.
- **Native Functionality:** Integrated Capacitor plugins to access device-native features such as camera, geolocation, push notifications, and offline storage.
- **Integration with APIs:** Integrated RESTful APIs and third-party services to fetch and display real-time data, enhancing app functionality.

- **Efficient Development Workflow:** Streamlined the development process with reusable components, modular architecture, and optimized build pipelines.
- Reduced app development time by 25% by creating a reusable component library for mobile UI elements.

Web developer

R P Softech at Ahmedabad, Gujarat

July 2021 - July 2022

- Learned and applied HTML5 and CSS3 to build responsive and accessible user interfaces. Gained hands-on experience with JavaScript and TypeScript, focusing on writing clean and maintainable code.
- Developed web applications using Angular, including creating components, directives, and services. Familiarized with Angular Material to design and implement user-friendly and consistent UI components. Learned to use Angular Router for navigation and implemented lazy loading to improve application performance.
- Practiced creating dynamic and reactive forms using Angular's Forms Module for effective user input handling. Collaborated with team members to implement responsive design principles, ensuring cross-device compatibility.
- Gained experience with Git for version control and collaborative development.

Projects

WebSite Development

Developed interactive websites using HTML, CSS, and JavaScript with clean and semantic code. Implemented responsive design principles to ensure optimal user experience across devices.

Built SPAs leveraging Angular features like components, directives, and two-way data binding. Configured Angular Router for navigation in SPAs, including lazy loading for optimizing performance. [\[Link\]](#)

Prime Ng (UI library)

Provides a comprehensive library of pre-designed and ready-to-use components like data tables, dropdowns, charts, and more. Offers multiple themes and CSS utilities to match the desired application design, reducing development time for styling.

I made some Form and Shared controller Across this Project using Prime Ng. [\[Link\]](#)

Shiv Bullion (Bullion dealers)

Real-time updates on gold, silver, platinum, and palladium prices based on market rates. Price calculators to determine the value of bullion based on weight and purity. Fully responsive UI to ensure a seamless experience on any device.

Create a robust admin dashboard for managing products, orders, and users, with real-time analytics.

Modular design allows for reusable components, such as pricing widgets, charts, and product cards. Suitable for growing user bases and increasing product inventories due to Angular's scalable architecture. Use Angular Universal for server-side rendering (SSR) to improve SEO and search engine visibility. [\[Link\]](#)

Education

B.Voc in Software Development

Tata Institute of Social Science

June 2019 - June 2022

High secondary School

Rashtra Bharti Vidya Mandir

June 2017 - May 2019
